

We are looking for

Senior Frontend Engineer

f/m/d · Berlin

with a focus
on **React Native** + Web
to support our dev team
in shaping the next generation
of decentralized identity

Jolocom is looking for a full-time Senior Frontend Engineer with strong programming skills, backed by a passion for both web and native mobile development, to build a truly outstanding product experience.

At Jolocom you will:

- work in tandem with Jolocom's design team to deliver a full redesign of our SmartWallet application for mobile platforms (iOS and Android);
- collaborate with our Engineering Team, especially re: backend development;
- build new product features from start to finish (from conception all the way through research, maintenance, and refinement);
- improve UI and UX across all our web/mobile projects.
- engage and educate the community, from users to contributors.

You may be a fit for this role if...

- your portfolio includes relevant projects or related activities;
- you are familiar with animation techniques (don't be afraid, we are reasonable);
- you are passionate about building great digital experiences;
- you are aware of and interested in software architecture and design patterns;
- you gravitate toward idiomatic, well-structured, and testable code;
- you have persistent drive to make improvements and innovate, desire to have an impact by effectively managing conflicts and priorities, and by thinking creatively and solution-oriented;
- you are excited to help solve complex UI problems with us.

Skills needed for the role:

- Typescript;
- React + Redux + Redux Thunk, for both web and mobile frontends;
- React Native for cross-platform mobile development;
- *other tech (bonus!)* Node.js for backend development and library code, Raspberry Pi, Docker + Docker Compose;
- fluency in English is a must, German is a plus.

What to expect from us:

- a flat (horizontal) organization — we avoid top-down management;
- supportive, collaborative and friendly atmosphere;
- multi-product environment;
- Kanban workflow;
- clear & rigorous documentation;
- product features built to specifications;
- realistic project estimation times;
- design systems and adaptable productivity infrastructure;
- opportunities to come up with your own solutions for technical challenges around dataflow, reactivity and performance;
- a deep appreciation for open source;
- an exciting cryptography-based product with incredible potential.

What it's like to work at Jolocom?

At Jolocom we are on a mission to put people, organizations, and machines in control of their data using decentralized identity management technology.

We create software systems that resolve significant challenges in digital identity & access management while delivering person-first user experience.

We maintain a calculated balance between pragmatism (shipping code), deeply informed protocol design, and strict application of robust engineering principles.

Crucially, we believe in a collaborative approach to creation: at Jolocom we share a definitive appreciation for the transformative power of open source.

All of this happens in the heart of Berlin.

We're an interdisciplinary team including colleagues with specialties in engineering, design, product, business and community engagement.

If this sounds like you, and you're ready to join a young, passionate group of problem solvers we invite you to apply today by sending your resume or CV to hello@jolocom.io.
